

AJIJOLAOLUWA ADESOJI DAVID

FULL STACK & AI ENGINEER | AI SOLUTIONS BUILDER

📍 Ogun State, Nigeria 📞 09065440091 ✉️ ajeeflutterdev@gmail.com
ajijolaoluwa-adesoji.vercel.app github.com/AjeeAI linkedin.com/ajeeflutterdev

Forward-thinking Full-Stack Developer combining strong web and mobile engineering roots with advanced AI integration skills. Experienced in building scalable web platforms, Agentic workflows, secure payment systems, and infrastructure monitors that solve complex cultural and educational problems.

TECHNICAL EXPERTISE

AI & MACHINE LEARNING

LangGraph (ReAct)

RAG Pipelines

Gemini & GPT-4o

Sentence Transformers

FRONTEND & MOBILE

Next.js

React 19 & Vite

Flutter & Dart

Tailwind CSS 4

BACKEND & CLOUD

FastAPI

Neo4j & Qdrant

Firebase & Supabase

Docker

CERTIFICATIONS

Google Cybersecurity
Professional
Coursera (2025)

Deploying AI into Production
DataCamp (2025)

Introduction to FastAPI
DataCamp (2025)

WORK EXPERIENCE

Lead IT Instructor

MAY 2026 – PRESENT

UNITES INTEGRATED | NIGERIA

- Serve as the principal tutor for technical subjects including JavaScript, Operating Systems, IT Essentials, and Scratch.
- Drive end-to-end instructional management by developing comprehensive work plans, curriculum content, and success metrics.
- Act as the primary administrative coordinator and liaison between Unites Integrated and partner institutions to align project goals and communication.

AI Fellow (AI Developer Track)

2025 – March 2026

NCC | ABEOKUTA, NIGERIA

- Selected for the specialized AI Developer track, focusing on engineering end-to-end AI solutions.
- Completed intensive training in building agentic workflows using React, FastAPI, and LangGraph.
- Implemented Vector Databases and Graph DBs to architect advanced Retrieval-Augmented Generation (RAG) systems.

Freelance AI Trainer & Developer

DEC 2025 – JAN 2026

MULTIMANGO/OUTLIER | REMOTE

- Trained and refined AI models on complex web development tasks to improve code reasoning and accuracy.
- Conducted Named Entity Recognition (NER) and precise labeling using CVAT to improve datasets.

Data Annotator

NOV 2025 – JAN 2026

AWARRI | LAGOS, NIGERIA (REMOTE)

- Collaborated with the Awarri team to annotate, label, and validate high-quality datasets for training African-centric AI models.
- Ensured data accuracy and consistency to improve cultural relevance.

CNII Sentinel Eye

2026

Critical Network Infrastructure Intelligence Monitor

Architected a LangGraph ReAct agent powered by GPT-4o-mini for autonomous threat assessment. Developed a Flutter mobile dashboard with interactive geospatial mapping and Telegram alerts.

FASTAPI, LANGGRAPH, FLUTTER, SQLALCHEMY, OPENAI

MasteryAI

AI AGENT

Personalized Tutor for Math & English

Utilized Neo4j knowledge graphs to create adaptive learning paths and study tracks. Built a RAG pipeline utilizing Qdrant to provide context-aware explanations.

FASTAPI, LANGGRAPH, QDRANT, NEO4J

EduIntellect

HACKATHON ENTRY

AI-Powered Bursary & Payment System

Developed a Gemini-powered RAG pipeline for conversational school policy queries. Built backend verification for Interswitch Quickteller Business API to settle tuition payments.

REACT, FASTAPI, GOOGLE GEMINI API, INTERSWITCH WEBPAY

AwaSabi (N-Atlas Hackathon)

TOP 10 FINALIST

Indigenous Language Platform

Integrated the N-Atlas model to power a dynamic curriculum engine for indigenous Nigerian languages. Implemented Speech-to-Text functionality and a "bridge" translation system.

REACT, PYTHON (FASTAPI), N-ATLAS LLM

Nigerian Tax Assistant

AI COMPLIANCE

Financial Compliance Tool

Built a compliance tool to calculate tax liabilities based on current Nigerian tax laws using an intelligent logic engine.

REACT, FASTAPI, PYTHON, TAILWIND CSS

FULL-STACK & MOBILE DEVELOPMENT

Bookish

REACT 19, VITE, TAILWIND 4, FIREBASE

Engineered a modern CMS with secure admin routes via Firebase Auth. Integrated Cloudinary for media management and real-time Firestore updates.

YouTube Downloader

FLUTTER DESKTOP

Designed a standalone Flutter application to bypass browser restrictions and manage content reliably.

E-commerce App + Admin

FLUTTER, FIREBASE, STRIPE

Built a dual-interface mobile application managing real-time stock and secure payments via Stripe integration.

Bachelor of Science (B.Sc.) in Statistics

2019 - 2025

Obafemi Awolowo University (OAU) | Ile-Ife, Nigeria

Final Year Project: Designed a multi-step IoT authentication system using mathematical combinatorics (Mutually Orthogonal Latin Squares) to ensure high entropy and security.
